

## Overview

Normally you start a Clarity program by logging in and choosing from a set of menus. However, sometimes a teacher will want a student to only work on a particular unit or exercise - and needs a way to direct the student to this place. You might also have a system-wide logging in process and want to avoid repeating that. This document shows how to do these things. It applies only to the online versions of the programs.

## Basics

The normal way to start a Clarity program, such as Tense Buster, is to link to the Start.html page that comes as part of the installation (or Start.php for online subscriptions). To get direct access or to skip login you need to pass extra information to the program before it starts. You can do this by creating a weblink in your webpage that passes the extra information as parameters. The rest of these notes will discuss the parameters. A simple example is <http://www.ClarityEnglish.com/area1/TenseBuster/Start.php?username=Adrian&password=Secret&prefix=xxx...> The prefix is unique to your account and has been sent to you in your welcome email. Do contact us if you have any concerns.

## Skip login

If you already know the student's details because they have logged into your home page, you can pass these to the Clarity program for validation.

```
username=xxx  
password=xxx
```

If these are not correct (or not recognised in the Clarity database) the student will be shown the login screen as per normal.

## Start a particular course

```
course=1
```

The ID of each course can be found from looking in the table at the end of the document.

The ID of Author Plus courses you have written yourself needs to be found by looking in the file /Clarity/Content/AuthorPlus/course.xml. This will show a node for each course, and that node will have an ID attribute. It will be a long number.

```
course=1  
startingPoint=unit:u3 or  
startingPoint=ex:154621545877
```

## Start a particular unit or exercise

The ID of each course and unit can be found listed below. The ID of each exercise has to be read from the index that controls its menu. This is called menu.xml and for Tense Buster Elementary it is at /Clarity/Content/TenseBuster/Courses/TB ELE/menu.xml and, as an example, the unit for I, me, my has id=1192013076442

## Change the interface language

The student normally chooses from a list of languages for use with button names and instructions. If you want to limit this list, force just one, or to set a default, use the following:

```
language=FR* - this will force French  
language=ZHO - this will use Putonghua as the  
default, but the list will still have other options  
language=EN,TH - this will have just English and  
Thai options
```
