Author Plus Pro 4 - Consolidation

Consolidation

In the first three tutorials, you learnt:

- ▶▶ to make Multiple choice, DragOn and StopGap activities.
- ▶▶ to add graphics and audio from within the program.
- ▶▶ to add your own graphics and audio files.
- ▶▶ to add feedback.
- ▶▶ to change the Marking style.

You are now going to teach yourself:

- ▶▶ to make Cloze activities.
- ▶▶ to add Hints and Alternative correct answers.
- ▶▶ to add a Weblink.

It is best to do this exercise in pairs, but you can do it alone if you prefer.

Tip: Use the **What do I do now?** button and the **User Guide** (accessible from the front screen).

1. Start by finding your own text. You are going to remove words or phases from it that learners will have to replace later.
2. When you start, choose the Cloze exercise type.
3. When you have made the gaps, add feedback and hints to each gap, and add alternative correct answers where appropriate.
4. Find a suitable website to link to and work out how to make the link.
5. Decide on the most appropriate Marking style.
6. When you have finished, exchange exercises with another pair. Do the other pair's exercise as a student.
7. Finally, discuss how your exercises could be improved.
