

## Author Plus Pro 8 - Consolidation

In this consolidation session you will practise including your own audio and graphics into exercises. If you are working on this training session alone, you can attempt the tasks one after the other. If there are more of you, why not split up, do different tasks and compare notes afterwards.

### Task 1

Experiment with using Countdown for dictation. Create at least one exercise.

### Task 2

Create a Drag and drop exercise with:

- a) Your own audio instructions (Settings, Audio, More, Auto play)
- b) Audio after marking
- c) Your own graphic, correctly resized.

### Task 3

Find Score-based feedback on the Settings screen. What is Score-based feedback? Look it up in the User Guide. Then create a StopGap activity with Score-based feedback.

What have you learned? Make notes.
