

Crossword Challenge, from ESP, enables students to challenge themselves in English, by calling up one of thousands of crosswords or wordsearches. Unlike many crossword generation programs that give one word clues, this program offers students proper definitions of words, often with examples of the word or phrase in use, as students would find in a student dictionary. This means that if the word or phrase is new to a student, they will have much more confidence in being able to use the item accurately, once it has been learnt.

With 100 new vocabulary items for verbs, adjectives, word partnerships and phrasal verbs, along with 150 for nouns, at each of the six levels (a total of 3,300 lexical items) this program is an excellent learning tool.

Crossword Challenge's other great facility is that students or teachers can create their own groups of words and input them easily into the program - and easily means extremely easily. The program will then generate a crossword with

Language Areas

- Vocabulary
- Grammar
- Spelling
- Word combinations
- Pronunciation
- Word stress

Target Students

Late primary to Adult learners

Language level

Beginner to Advanced

Technical Requirement

Win 95/98/NT/2000/ME/XP
