

**Practical and effective, particularly for learners who like the challenge of a competition.**

I like the graphics and the way the whole thing is set up. I also really like the way that the items are randomly selected so you are always playing a new game but some things will be recycled. Also, the fact that you have a choice about what kinds of lexical items you want to practice. I can see, for example, as it gets bigger, a student could focus on something like English for Academic Purposes.

I am glad to say that I found Hex-Lex to be beyond my wildest expectations...Above all, it is a software package that gives you and the learners the full freedom to adapt it according to your class needs and not vice versa.

Your games are so user-friendly, which is a great plus for ICT beginners.
