

Pronunciation Power 1:
Beginner to Intermediate

Pronunciation Power 2:
Intermediate to Advanced

Pronunciation Power, from ECLI, is a user-friendly interactive program at two levels aimed at English learners of all ages. Each level contains over 20 hours of instruction designed to help students recognise and pronounce the 52 sounds of English.

Pronunciation Power includes the following activities:

Sound menu. Choose the sounds by clicking on them with the mouse and then hear them pronounced by the instructor.

Speech analysis. Listen to the instructor pronounce the sound and view the instructor's wave form. Record your own pronunciation of the sound. Compare your sound and wave form with that of the instructor.

Lessons. Listen to the sound and learn how it is made through front and side view videos and animation.

Exercises. Choose from four exercises to help you practise the sound you have chosen. Exercises include:

- Sample word exercises where you compare your pronunciation to the pronunciation of the instructor.
- Discrimination exercises where you have to discriminate between two similar but different sounds (eg pat and bat).
- Sentence exercises where you listen to sentences and then record them.

Features of Pronunciation Power at a glance:

- 20 hours of listening time
- 1,800 individual practice words, 1,200 practice sentences
- helps students recognise and pronounce all 52 sounds in English
- analyses students' own pronunciation using wave forms
- shows how sounds are made using video
- helps students with spelling

Language Areas

- Pronunciation
- Listening
