

Using **Vocabulary Builder** is a fun way for young children to learn basic vocabulary. The program, from Eurotalk, combines pictures, text and sound to make an interactive flash card system which teachers can use to help in basic language teaching.

Students can choose whether to learn vocabulary, play vocab games or record their own story using the vocabulary they've learned. Spoken help is available in 40 languages from a terrifically talented animated tiger.

The program is available for 24 other languages including French, German, Spanish, Cantonese and Mandarin.

Games and activities include:

- Plurals
- Beat the clock
- Learn-Games-Record
- Where is the gorilla?
- Record you own story
- The frog is on the leaf!
